

Waste disposal coolers KFK

Products available – at a glance

To prevent bad odours and contamination in professional kitchens, this hygienic solution holds food waste, ready for collection. The straight forward coupling system enables quick assembly (can be done from the inside if space is restricted). Thanks to the sloping floor the wheeled bins are easily rolled in and out. Also equipped with a handy spring cover which remains open while pouring. Waste disposal coolers are available in two size options and two exterior designs: anthracite or stainless steel (AISI 304). The waste disposal coolers are supplied without wheeled bins.

Machine unit - adjustable range refrigerator +2°C/+12°C

Specification	Product	Finish	Refrigerant	List Price
Cooling capacity: 463 W* Power consumption: 385W* Electrical Supply: 230/50/1 Dimensions (mm) 304 	KFKHC/MUCS	Stainless steel AISI 304	R600a	€1.314
