

# PAIRING AESTHETICS AND FUNCTIONALITY

## EYE CANDY FOR YOUR DRINKS

Expand your creative horizon and your craft's aesthetic possibilities with the help of our Special Ice Makers that produce different, extraordinary shapes of ice.

Specially tailored for cocktail bars that like to differentiate themselves from others, whilst never compromising on taste and quality of their drinks. With perfect ice characteristics still in focus, you can now add a decorative highlight to your cocktails and long drinks.

Our Special Ice Makers work, similar to our famous Cubers, with our patented closed-cell system.

Each ice shape is made individually by a dedicated spray of fresh water. This happens within a closed cell to achieve the highest possible compactness of an ice cube with the perfectly precise shape of a ball, star, heart, cylinder, big cube or long cube.

Owners of a Hoshizaki Special Ice Maker can look back on times of manually molding single ice forms. Now, they enjoy the convenience of scooping absolutely identical ice shapes from the built-in and easily accessible storage container.

### SPECIAL ICE

Ice type: Star  
Weight: 18 g

Ice type: Heart  
Weight: 25 g

Ice type: Ball  
Weight: 45 g

Ice type: Cylinder  
Weight: 42 g

Production capacity/24 h:  
240 kg  
Ice type: Cylinder

*"Hoshizaki is a market leader when it comes to ice, but more than that, they are an aspirational brand (...) creating ice in a different form, that allows you to be more creative behind the bar."*

# THE RAPID FRESH MAKERS

## WATER & ICE – IS THERE A BETTER TEAM?

Dispensers play a crucial role when business owners want to provide ice and/or water for self-service. The three steps of quality ice production, protected ice storage and the quick service of ice are all combined in one device – with the help of only one button your refreshment is ready in seconds.

With **DCM DISPENSERS** the user can select from these options:

- Cubelet ice only
- Cubelet ice and water
- Water only

The production capacities of these compact, yet powerful ice/water dispensers range from 60 kg a day for smaller businesses to up to 230 kg a day for sizable venues, such as amusement parks, hotel resorts and large-scale quick serve environment.

Most commonly, Hoshizaki dispensers are used, where a quick, efficient, and food-safe serving of ice-water combinations is needed.

**DIM DISPENSERS** produce and provide the famous Hoshizaki cubes for handy self-service. What makes this dispenser so popular is its convenient portion control, which can be set easily. This allows you to precisely regulate the serving sizes. This range of self-serve dispensers is often placed in hotels, positioned on each floor, to provide guests with quality ice all around the clock.

With an elegant and lean look, they almost disappear within modern interior designs. Focusing on user-friendliness and maximum food safety, air or light never hits the freshly produced ice, while stored, providing maximum contamination protection for operators and consumers.

**DSM DISPENSERS** are compact and reliable appliances that produce and serve high quality shuttle ice. The simple design and smart features, for food safety and against contamination, make DSM dispensers popular for hospitals and health care institutions.
